EXHIBITION SHOWCASE

Shared Campus

Small moments.
Shared connections.

A public map, personal phones
and playful first encounters.

[Your name] · A2 · 2026

A small invitation to connect

How might a shared campus space make a first interaction easier?

PRIMARY

Connection

A small shared action before a conversation.

SECONDARY

Joy

Playful choices and unexpected outcomes.

ALSO

Reflection

Leave a wish. Read someone else’s.

Audience focus: international students and other campus visitors.

Images: prototype assets / controlled browser screenshots, project repository (2026).

One shared place. Your own way in.

01
Scan
Use your own phone.

02
Choose
Nickname + avatar.

03
Explore
See others nearby.

04
Notice
Follow a glowing invitation.

05
Share
Make, play, wish or listen.

A first encounter in approximately two minutes or less.

The whole map can be explored at your own pace.

Images: prototype assets / controlled browser screenshots, project repository (2026).

From noticing to participating

INSERT YOUR SHOWCASE VIDEO

75 seconds / two participants + phones + public display

Join → meet → collaborate → reflect → listen

Replace this page with real recorded footage before presenting.

Brief requirement: a 1–2 minute showcase video of the experience in use.

Images: prototype assets / controlled browser screenshots, project repository (2026).

Two people. Four choices. One shared drink.

LIVE DEMO

Room: showcase
Two phones, one display
Target: 60 seconds

Open public display ↗

Images: prototype assets / controlled browser screenshots, project repository (2026).

The six course principles, applied

A course framework connected to concrete design decisions.

01
Sensory Feedback
Piano sound confirms actions.

02
Embodied Interaction
Dragging maps to movement.

03
Social Dynamics
Co-presence and split roles.

04
Resilience & Motivation
Gentler fishing and retry.

05
Proactivity & Clarity
Proximity glow and turn cues.

06
Ethics & Inclusion
Temporary IDs, mute and exits.

Framework: Session 2, p. 6; Session 3, p. 8. Grounding: CSCW / affordances / signifiers (Sessions 2 & 5).

Images: prototype assets / controlled browser screenshots, project repository (2026).

A familiar campus, with small invitations

A narrative setting

A shared campus rather than a linear quest.

Visual invitation

Consistent icons, soft colours and proximity glow.

Sensory reward

A shared result, a surprising fish, a live melody.

Images: prototype assets / controlled browser screenshots, project repository (2026).

From initial concept to refined interactions

Concept shift	Cultural prompts / shared visuals	Free exploration + shared activities
Reliability	Missing players / messages	Refined presence + shared state
Mobile view	Small avatar / unused space	35% zoom + full viewport
Cooperation	Jerky / difficult fishing	Smoothing + gentler timing
Shared access	Separate piano page / idle use	Map controls + 8-second release

Initial concept: Social Interactive, slides 5, 7–8. Tokens not carried forward; unused streetlight placeholder removed.

Images: prototype assets / controlled browser screenshots, project repository (2026).

A small architecture for shared participation

PERSONAL INPUT

Phones

Choose, move and interact.

↔

SHARED STATE

Firebase

Positions, turns, notes and wishes.

↔

COMMON VIEW

Public display

See co-presence and shared outcomes.

p5.js renders the world. GitHub Pages hosts the site.

Verification: 26 local checks + browser checks + reported device trials.

Exhibition needs: stable internet, charged phones and a recorded fallback.

Automated checks are not a substitute for audience evaluation.

Images: prototype assets / controlled browser screenshots, project repository (2026).

Small invitations. Shared experiences.

Watch. Listen. Leave a wish.
Or do something together.

Next evaluation:
Can unfamiliar participants begin independently?

AI-assisted development was selected, tested and refined — not treated as finished output.

AI USE

Code + debugging
Some activity artwork
Presentation drafting

Confirm tutor approval, permitted use and the required declaration before submission.

Impact on belonging has not yet been established through an independent participant study.

Images: prototype assets / controlled browser screenshots, project repository (2026).

Thank you. Try it together.

Course sources

GRDE2053. A2 assignment brief, pp. 1–5. Supplied course document, n.d.
GRDE2053. SIE–DCI A2 Exhibition Showcase marking rubric. Supplied course document, n.d.
GRDE2053. Sessions 2 (p. 6), 3 (p. 8) and 5 (slides 6–10). Course slides, n.d.
Initial concept: Social Interactive.pptx, slides 5, 7–8. User-supplied concept deck, n.d.

Project media + implementation

Prototype screens: public-map-project repository, 2026; controlled browser captures.
Map / avatars: user-supplied assets; confirm original creators and licences.
Some activity icons / fish cut-outs: AI-generated or AI-refined; list individual assets.
p5.js • Firebase Realtime Database • GitHub Pages • Web Audio API.

References here use a provisional author–date format. Match the referencing style in your unit outline.

Before you submit

01 Fill in your name; check the verified theory mapping and initial-concept comparison.

02 Record and insert a real 1–2 minute showcase film.

03 Rehearse a 5–7 minute presentation including video and live demo.

04 Prepare the separate development PDF: maximum 15 pages, excluding title / references.

05 Include coversheet, requested MP4 / SharePoint link and tutor access.

06 Confirm AI approval, declaration and media attribution; check milestone completion.
